Authorized Distributor / Reseller

MT-4308W (U.S. Patent 9436226 B2) is specifically designed for both retail and hospitality applications. The retail-ready 8" mobile POS runs on the latest Intel Cherry Trail processor supporting MSR/RFID attachment, 1D or 2D barcode scanner built-in with pistol grip, and an optional dock station to convert the device into a full-fledged, stationary POS.

### Retail-ready Mobility

The latest Windows based mobile POS MT-4308W is proven to be retail-ready with a Corning Gorilla Glass touchscreen display to ensure its durability and improved drop resistance.

### Ergonomic Design

The retail package includes a detachable pistol grip (PG-200E) with optional built-in 1D or 2D barcode scanner. Its ergonomically designed pistol grip shape handle enables the user to easily carry the tablet.

### Extra Protection

The hospitality package comes with a practical hand strap, which prevents the tablet from dropping on the ground accidentally and eases the user's fatigue during the hours of work.

### Long Hour Operation

MT-4308W is built with advanced power saving technology that provides long battery life for daily operation. For store owners who require even longer battery life for more intensive usage, the pistol grip also houses a removable battery that can vastly extend the overall operating time.

### Versatile Function

The optional dock station for MT-4308W integrates a wireless 3" thermal printer and full suite of connectivity options such as Serial ports, USB ports, LAN port and CR port. Once the tablet is integrated with its dock station, an all-in-one POS is instantly at your disposal. MT-4308W offers more than just mobility but versatility.
